# The Road to RTGS ISO 20022
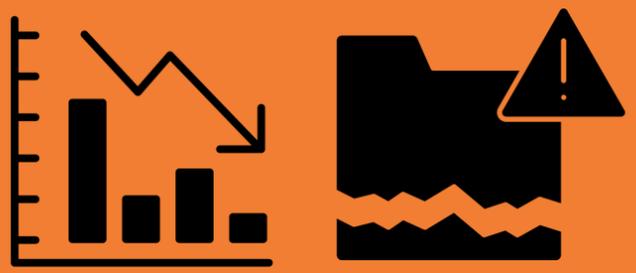

Choose the path that leads to compliance and confidence

**ISO**

## CLEAN, STRUCTURED DATA

## NON-COMPLIANCE

### FASTER PAYMENTS

Structured data reduces exceptions by 30%

### PAYMENT FAILURES

Incorrect address data contributes to up to 40% of payment exceptions

### LOWER COSTS

Automated validation cuts manual correction time by up to 70%

### RISING COSTS

Bad data costs organisations an average of £100 per affected customer record

### FUTURE-PROOFED DATA

Organisations with structured data see 50% fewer integration issues during upgrades

### REGULATORY EXPOSURE

Only 35% of organisations claim to be ready for structured address requirements

### ISO 20022 READY

Clean data improves mapping accuracy to structured fields by 95%

### DELAYS & FRICTION

Manual data correction increases procession time by up to three times

Hopewiser provides the tools to clean and structure your data, ready for RTGS ISO 20022
